

1. Replace this with below:

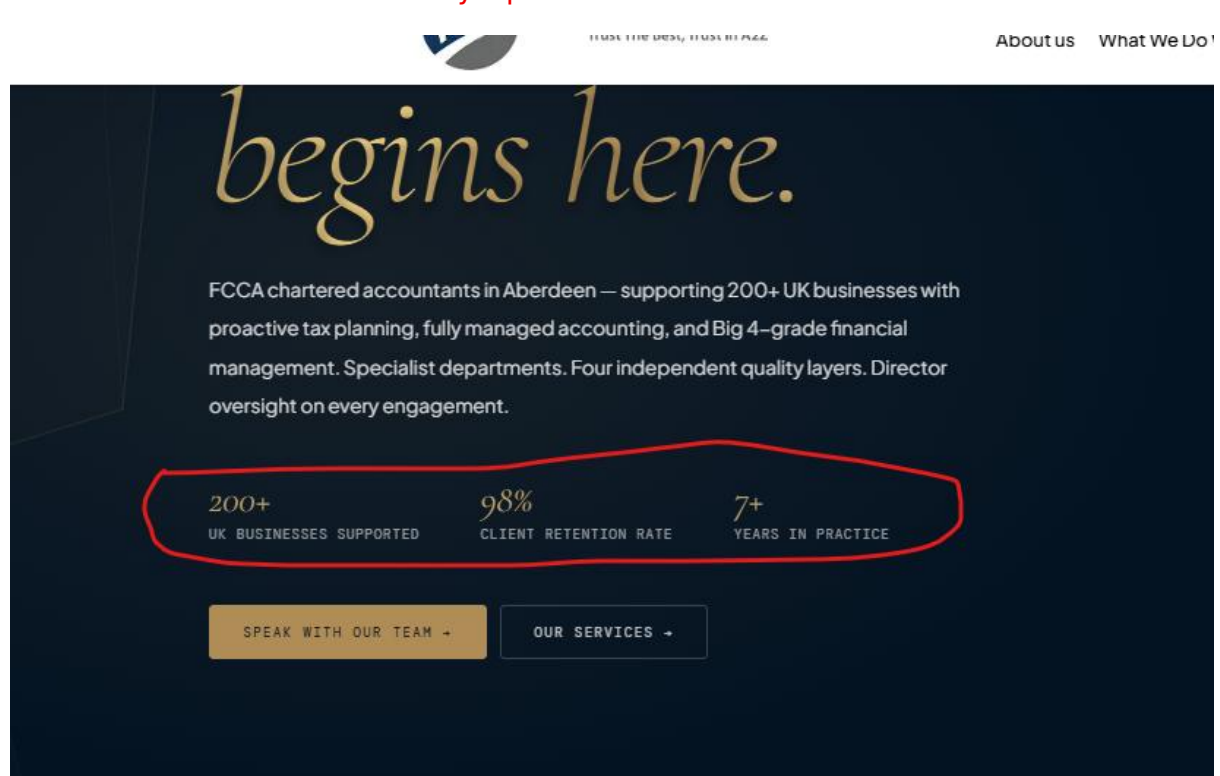

Fellow of the Association of Chartered Certified Accountants (FCCA) and Economics (Honours) graduate of the University of Aberdeen, our founder went on to manage complex international group accounts at Subsea 7, a multibillion-pound oil and gas contractor, to Big 4 audit standards imposed by Deloitte and EY.

A2Z was founded after seeing growing businesses consistently underserved by accountants treating compliance as a box-ticking exercise — and built the finance function they deserved.

A2Z is not a compliance only firm. It is the fully managed finance function that ambitious businesses deserve.

2. Remove this one as it is already repeated below it.

### 4. We will remove this content here and I instead have our teams' pictures/profiles on it.

### 5. Remove the things that are crossed and enlarge texts I circled.

Also, it say “Low accounting...”? Needs to say “Low quality accounting...”

**Four Layers Of Review.**  
*Every Single Time.*

~~Not aspirational promises — contractual obligations. Included in every engagement letter, measurable in writing, transparently communicated, and enforceable from day one, without exception.~~

- 1 **Specialist Complexes**  
Work is completed by department specialists with focused, deep expertise in their disciplines.
- 2 **Department Review**  
The department head independently reviews for technical accuracy, compliance, and completeness.
- 3 **Senior Verification**  
A senior accountant authorizes regulatory compliance and identifies possible planning opportunities.
- 4 **Director Approval**  
Your FSCA director personally approves every output before release. Without exception.

**Three Specialists.**  
*One Point Of Contact.*

~~Generalist firms ask one accountant to do everything. We separate the disciplines — payroll, VAT, and year-end tax — so each area is handled by a specialist whose entire focus is that work. Explore all services →~~
